DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21-31 are rejected under the judicially created doctrine of non-obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,230,662. Although the conflicting claims are not identical, they are not patentably distinct from each other because both inventions claim a method of transporting an animal comprising the placing of an animal transport cart near an animal needing transport, said cart comprising a polygonal shaped frame having at least one joint that allows said frame to be folded, a support sheet that is removably attached to said frame, at least one wheel attached to said frame and which allows for a rolling movement of the cart, and a locking mechanism, wherein the locking mechanism may be selectively engaged allowing said frame to have a substantially planar orientation; locating the support sheet substantially adjacent to said animal to allow the animal to

rest on the support sheet, and imparting a force to the animal transport cart so as to roll the cart to a different location.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the method of placing the frame substantially around the animal must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 32-35 are allowed.
